

Understandable in part - Medicine, Engineering, Nursing - A+S. What is part. Lth.?

We are one of 23 schools in this country but by far the largest - indeed the largest in the world
(900 students)

- Most of our research ^{persons & etc.} ~~is~~ mostly of our students are U.S. students and we do have students from 75 dif. nations and faculty today in residence in Beijing, New Delhi (India), Bangladesh and Peru. In future years, we expect more. ~~As Dr. Black will tell you,~~

Support for ~~public~~ ^{patients} concerns to us has grown steadily over recent years and during the past two years has accelerated as it has become apparent that issues of ^{protection and} cost-effectiveness in health care have begun to be ^{addressed} ~~examined~~ critically ^{for the first} ~~for the first~~ really for the first time ^{in decades}. (highlighted)

Within the past 12 months - support has stemmed over ourselves - Int-Health - corp. agreement of \$5x10⁶; growth if we want it \$8-10x10⁶/yr.
~~from Fed; Dept & the early from Rockefeller~~
 EHS - Chr. grant of nearly \$1x10⁶/yr. for fac. + instruments
 NPM - Dr. Davis has just assumed direction of its multi-million grant from The Commonwealth Fund.
 When we used to apply for 3 grants & receive 1 - now are receiving 3.

Principle problem now is to decide whether or not we expand our physical plant to accomodate what is a major societal challenge.
